

Cognitus Pritunl VPN

Content

- Setup VPN Client (Desktop)
- Connecting via Pritunl Client (Desktop)
- Setup VPN Client & Connecting via OpenVPN Connect (Mobile)

Setup VPN Client (Desktop):

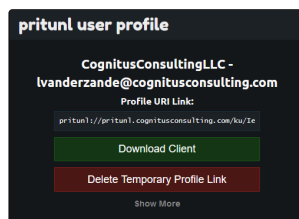

Downloading VPN Client and Copying Profile Link:

Go to

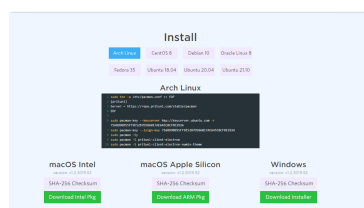

<https://pritunl.cognitusconsulting.com/>

Use the Sign in with Azure (SSO) Option

If there is a profile for you to use, you'll see something similar to this:

Download the Pritunl VPN Client by clicking **Download Client**.

Install the downloaded Pritunl VPN Client.

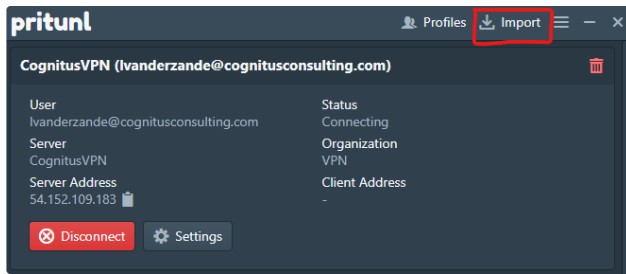

Copy the **Profile URI Link** (this will be used after installing the client).

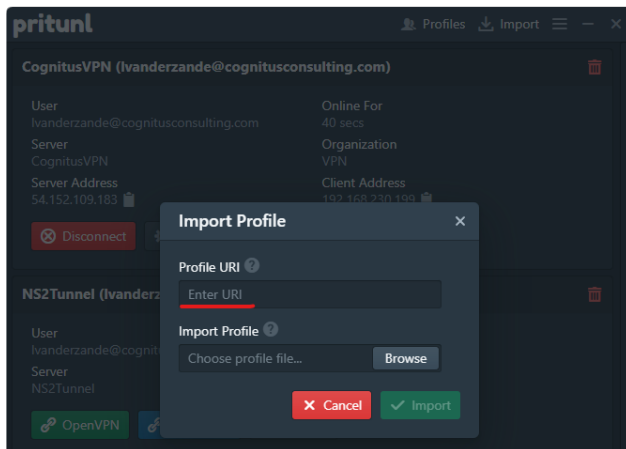

Importing VPN Profile

Open the installed Pritunl VPN Client.

Click the Import Profile URI button

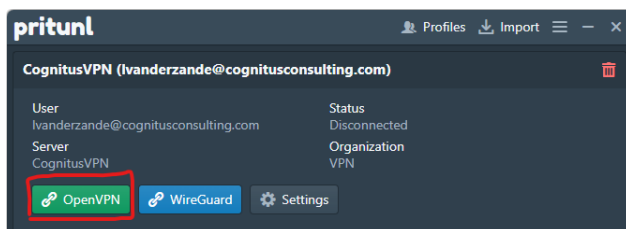

paste your copied **Profile URI Link**, and click **Import**

Now you're ready to connect.

Connecting via Pritunl Client (Desktop):

Find the profile which you want to connect to: (CognitusVPN)

System Admin Contact:

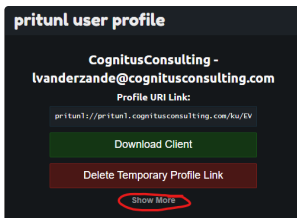

lvanderzande@cognitusconsulting.com

Setup VPN Client & Connecting via OpenVPN Connect (Mobile):

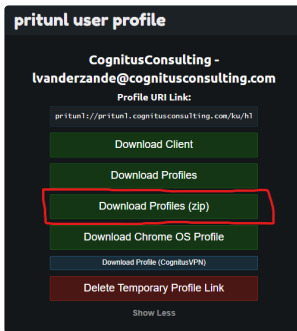

Important: iOS needs a special Profile, please raise a ticket in Jira for access to this!

Install OpenVPN Connect ([iOS](#) / [Android](#))

Visit <https://pritunl.cognitusconsulting.com/> and Login via Azure (SSO)

Use the Show More button to give you the option to download the profile

Use the "Download Profile (zip)" button to download the VPN profile to your mobile device.

Inside the zip will be a OVPN (OpenVPN) file.

Import the downloaded profile into OpenVPN Connect.

If you have access to the iOS profile, use that instead of the CognitusVPN profile.

To import the profile on iOS you need to open the downloaded .ovpn file in your browser, and share it to OpenVPN
