STEVEN JAGODA

Senior Full Stack Developer

steven.jagoda@outlook.com
Cape Coral, FL, United States

SUMMARY

Highly skilled and results-driven Senior Full Stack Developer with over 10 years of experience in developing robust web applications. Proficient in **React.js**, **Next.js**, **Angular**, **Vue.js**, **Node.js**, and **Java** with a strong understanding of modern web development frameworks and tools. Demonstrated expertise in creating scalable and maintainable code solutions that meet client requirements. Proven ability to lead and collaborate with cross-functional teams to deliver high-quality software products. Committed to staying updated with the latest industry trends and continuously improving development practices.

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer

Belcan

= 01/2018 - 12/2023

- Designed and developed responsive Web/Mobile Platform UIs using React.js, TypeScript, Angular, Vue.js, and Node.js
- Developed and maintained full-stack web applications using the MERN stack.
- Strong experience with back-end languages and frameworks such as Java, and PHP and frameworks like Spring Boot and Laravel
- Integrated RESTful APIs and worked with databases to manage data and ensure data integrity.
- Used Gatsby.js and Next.js for server-side rendering, improving performance and SEO.
- Utilized micro-services and RESTful API calls with a focus on shared components and reusable code.
- · Configured and maintained cloud-based services like AWS, Azure, and GCP.
- Used version control systems (e.g., **Git**) to track changes and collaborate with other developers.
- Utilized containerization technologies like Docker for consistent deployment across different environments.
- Implementing testing frameworks like Jest, Mocha, and NUnit.
- Utilizing bug tracking tools such as Jira and Bugzilla to report and manage issues.
- Developed and maintained web3 wallet mobile app using React Native.
- Led the frontend development team in building responsive and user-friendly web interfaces using React and Angular.

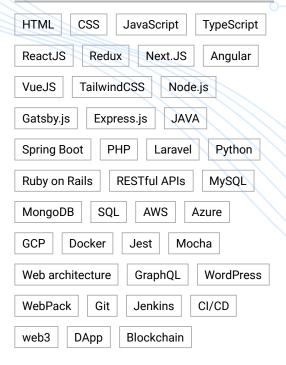

Full Stack Developer

Locus Robotics

i 11/2016 - 12/2017

- Designed and developed responsive Web Platform UIs using React.js, Typescript, and Node.js.
- Created visually appealing and user-friendly interfaces using HTML, CSS, and JavaScript
- Utilized front-end frameworks and libraries such as React, Angular, and Vue.is.
- Developed server-side logic and application programming using languages like **Node.js**, **Java**, **Python**, and **Ruby**.
- Implement server-side frameworks such as Express.js, Spring Boot, Django, and Ruby on Rails.
- · Developed reusable components using React, Typescript, Redux, and Hooks.
- Used Gatsby.js and Next.js for server-side rendering, improving performance and SEO.
- Built user interfaces and business logic for web apps based on Vue 3 and TypeScript.
- Explored and implemented blockchain technologies for secure and transparent data transactions.
- Collaborated with UX/UI designers to implement visually appealing and intuitive interfaces.
- Worked with relational database (e.g., MySQL, PostgreSQL) or NoSQL database (e.g., MongoDB) to store and retrieve data integrity.
- Worked with Agile software lifecycle methodologies.

TECHNICAL SKILLS

EDUCATION

Computer Science, Bachelor's degree

Florida Institute of Technology

STRENGTHS

Key strengths

Proficient in multiple programming languages, strong problem-solving skills, and a track record of effective collaboration in cross-functional teams.

PROJECTS

FullStack Developer

- Developed and maintained a robust and secure web application using Node, React, and MongoDB to streamline patient management and electronic health record (EHR) systems for healthcare providers.
- Designed and implemented a user-friendly patient portal, allowing patients to securely access their medical records, schedule appointments, and communicate with healthcare providers, resulting in improved patient engagement and satisfaction.
- Conducted regular code reviews, identified performance bottlenecks, and implemented optimizations to ensure the application's scalability and responsiveness met the demands of a growing user base.

Full Stack Developer

Google

苗 01/2012 - 08/2016

- Developed the front end of our web application with React.js, Redux, skillfully integrating **Webpack** for efficient bundling and optimized asset management.
- Built 100+ components in React.js, Angular, Vue.js using Javascript and Typescript asynchronous methods.
- Designed and implemented a complex financial analytics dashboard using React, Node.js, and PostgreSQL.
- Assisted in developing server-based Node.js & AWS software by providing inputs and insights, acquiring a 15% increase in the quality of overall work.
- Developed dynamic front-end applications using TailwindCSS, React, and **Redux** to validate user input and provide responsive feedback.
- Proficiently managed and automated our continuous integration and continuous delivery (CI/CD) pipeline with Jenkins, streamlining the build and deployment process for increased efficiency and reliability.

CERTIFICATION

Certified Full Stack Developer (CFSD)

This certification validates a Full Stack Developer's proficiency in both front-end and back-end development, encompassing a range of technologies such as HTML, CSS, JavaScript, Node.js and database Management.

AWS Certified Developer - Full Stack

This certification demonstrates expertise in deploying, managing, and scaling applications on the AWS cloud, covering serverless architectures, microservices, and database services.

React Developer Certification

This certification demonstrates proficiency in React.js, including building responsive user interfaces, state management, and integrating with back-end services.

PHP Certified Developer - Full Stack

This Certification focuses on proficiency in using PHP for both front-end and back-end development, emphasizing data modeling, indexing, and querying.
