My name is **Juan Pablo**.
I am a senior web & mobile & blockchain developer with rich experience.
Cryptocurrency is a major IT technology that has significantly increased economic transactions in recent years.
I've started to have interest in blockchain & crypto & nft and worked as a blockchain developer for 4+ years. High Quality + Fast Speed Delivery!

All the best,
JP.

Professional Experience

Jalisco   Multicell

May 2016 - March 2017

I undertook a comprehensive course on React Native and enjoyed learning about the different technologies involved, what is possible, best practices in Mobile development.

Tijuana   Bajalogics

June 2018 - Present

EXPERIENCE:

JUNE 2019 – JULY 2022

LEAD SOLIDITY DEVELOPER, GENIOUS PROTOCOL (DEFI)

My responsibilities would include, working closely with the CEO to ensure every aspect of the project is included in the contract properly, having daily SCRUM meetings with the team of other developers to ensure we are all on track and on the same page, and implementation of DeFi features such as Staking/Auctions while keeping gas optimization a priority.

October 2020 – CURRENT

SOLIDITY DEVELOPER, CRYPTIC SAPIENS (NFT)

My responsibilities would include, helping the senior solidity developer review/test the smart contract before sending out for audit.

December 2021 – CURRENT

SOLIDITY DEVELOPER, GAMEAROUND (NFT)

My responsibilities include utilizing Azure DevOps to collaborate with other members of the team (senior solidity developer & front-end team), write/test/deploy ERC20 &ERC721 & ERC 721A & ERC1155 standard smart contracts for clients by a certain deadline while ensuring all specs are included from the whitepaper.

JANUARY 2022 – CURRENT

SOLIDITY CONSULTANT

My responsibility was to speak with researchers from companies such as Microsoft about using solidity to build smart contracts, best practices, and the implementation of solidity in web3.

PROJECTS:

In addition, please take a look at some of my developed web & mobile apps:

WEB:

- **sunshield.finance(August 2021 - Present)** - complete Defi platform on BSC. Full defi platform which supports DEX, token, NFTs with ReactJS, web3.js and solidity. EVM Solidity Smart Contracts for reward token, dex, farming, Ip staking and NFT marketplace development.

- **bofb.com(December 2021-April 2022)** - BofB Tokenomics. BofB is a cryptocurrency platform to trade bitcoin and a very few other top-performing altcoins such as Solana, Ether and Cardano among others. In terms of crypto, there are essentially two different types of exchanges.

- **powned.co(October 2021 - March 2022)** - NFT marketplace on Ethereum and Polygon. Frontend & backend: Ruby and Rails. Blockchain: solidity/smart contract. Web3 integration:web3.js and ethers.js

- **stixex.io(December 2021 - June 2022)** - Online crypto betting platform on BSC and Polygon. The betting platform where users can deposit their funds in BUSD or USDT and place a bet depends on the candle color of the next timeframe. Techincally, this job involves EVM smart contract development on BSC and Polygon, backend development for database management and frontend development with Vue.js and firebase.
- **invokersnft.com(January 2022 - May 2022)** - NFT staking and IV token staking platform. And raffle system and coinflip game for invokers
- **solsisters.xyz(Octover 2021 - January 2022)** - NFT minting and Staking. Smart Contract and Integration with frontend. Solsisters NFT was minted over 7000

MOBILE:
- **luna dating app (Octover 2018 - January 2019) -** Following and vote functions on uploaded images and Auction/raffle for the uploaded images
- **Blaise Wallet (January 2021 - March 2022) -** Generate new private key and create new wallet address, Swap and send functions and purchase coins from credit card
- **Nucleus Wallet (May 2022 - Present) -** Integration social media app like instagram, a ride booking system like Uber and wallet using web3.js

+ **EVM** - Token development (reflection, reward, stable coin), NFT(P2E game, NFT minting, NFT marketplace, NFT staking/breeding/claim), DeFi(token staking/besting, lp farming/staking, lottery, trading competition, pancakeswap fork), DEX(uniswap v2, v3 fork), Crypto game(casino, lottery, P2E game), Wallet creation, Blockchain platform fork

Key Skills

Solidity, Web3, ethersJS, Rust
React, Vue, Angular, Bootstrap, PHP, NodeJS, Python
React Native, Android, Kotlin, Java, Swift
