Summary

I have been working on .NET desktop applications, image processing and web services (NodeJS, MongoDB) field.

I have completed freelancing jobs in various fields and that is my strong point, I am flexible on what your requirements are.

Most of my projects are related to web scraping and automation.

In my free time I further my knowledge in the fields that interests me.

Currently I am investing my time to learn blockchain technologies.

Skill Highlights

- MERN Stack
