As a Full Stack Web and Software Developer, I have gained over six years of experience in developing software applications using various platforms such as NodeJS, ExpressJS, ReactJS. I am highly skilled in collecting and documenting users' requirements, which helps me to develop logical and physical specifications that ensure the software solution meets the user's needs. To stay ahead in my role, I focus on staying updated with the latest technology trends, continuously learning new programming languages and development frameworks, collaborating with team members effectively, and following best practices for software development.
