HW

## SUMMARY

With over 9 years of experience in full-stack development and web security, I bring a robust skill set including HTML, CSS, JavaScript, and CI/CD. My dedication to optimizing web application performance and security has been recognized through numerous awards and successful project launches.

## EXPERIENCE

### Senior Full-Stack Developer

**Innovatech Solutions**

📅 01/2019 - Present    📍 Nottingham, UK

- Spearheaded the development and implementation of a scalable e-commerce platform, handling over 10,000 concurrent users.
- Led a team of 4 developers in creating microservices architectures that improved system performance by 30%.
- Collaborated with the security team to integrate advanced CSRF protection into web applications, significantly reducing vulnerability to attacks.
- Managed the end-to-end CI/CD pipeline, ensuring a reduction in deployment errors by 25% and facilitating seamless rollbacks.
- Optimized website load times by implementing content delivery networks and minifying assets, which slashed load times by 40%.
- Authored comprehensive system documentation, increasing the team's efficiency in onboarding new members by 50%.

### Mid-Level Web Developer

**TechSolutions Inc**

📅 06/2017 - 12/2018    📍 Leicester, UK

- Enhanced the mobile responsiveness of key client web applications, resulting in a 35% increase in mobile traffic.
- Improved code deployment practices by introducing containerization, which led to a 20% faster time-to-market for new features.
- Design and deployment of RESTful APIs for 3rd party integration, boosting overall system interoperability.
- Contributed to a 15% reduction in server costs by migrating legacy systems to cloud-based infrastructure.
- Assisted in organising quarterly company-wide hackathons to encourage innovative thinking and team collaboration.

### Junior Web Developer

**Digital Frontier**

📅 09/2014 - 05/2017    📍 Nottingham, UK

- Developed and maintained 10+ client websites, using HTML, CSS, and JavaScript, with a focus on user-centric design.
- Streamlined version control workflows using Git, which increased team productivity by 15%.
- Conducted comprehensive debugging and testing, reducing application downtimes by 18%.
- Engaged in continuous learning to keep abreast of the latest web technologies, enhancing the team's capability in offering cutting-edge solutions.

## EDUCATION

### Master of Science in Computer Science

**University of Cambridge**

📅 01/2012 - 01/2014    📍 Cambridge, UK

### Bachelor of Science in Software Engineering

**University of Nottingham**

📅 01/2008 - 01/2012    📍 Nottingham, UK

## PROJECTS

### Open Source E-Commerce Platform

Contributed to the design and implementation of features for an open-source e-commerce platform that supports small businesses.
https://github.com/e-commerce-platform

### Accessibility Plugin for Web Applications

Developed a plugin to enhance web application accessibility, following WCAG guidelines.
https://github.com/accessibility-plugin

## ACHIEVEMENTS

🏆 **Web Application Security Enhancement**
Integrated advanced security features into web applications, drastically reducing vulnerability to attacks.

🏅 **Automation of Deployment Processes**
Revolutionized deployment processes through automation, reducing errors by 25% and ensuring higher uptime.

🪄 **Optimization of Critical Software Systems**
Streamlined critical software systems, resulting in a 15% cost reduction and efficiency gains.

✔️ **Hackathon Organization and Leadership**
Organized and led quarterly hackathons, fostering a culture of innovation and team collaboration.
