EXPERIENCE

Devsinc, Lahore— *Software Engineer*

December 2022 - Current

Independent Software Engineer with a passion for full-stack development. Built a social links portfolio showcasing web development skills. Independently designed and implemented a comprehensive Human Resource Management System (HRMS) from scratch, demonstrating strong problem-solving and engineering capabilities.

Devisnc, Lahore — *Associate Software Engineer*

December 2021 - November 2022

Associate Software Engineer with 1 year of experience at Devsinc. Proven full-stack development skills in Ruby on Rails and React with TypeScript. Contributed to successful delivery of Applicant Tracking and Customer Relationship Management Systems.

EDUCATION

University of Central Punjab, Lahore — *Bachelors of Computer Science*

2017 - 2021

While attending the University of Central Punjab, I nurtured a passion for coding by taking on freelance projects. This experience provided a valuable foundation for honing my programming skills and gaining practical experience in the software development field.

PROJECTS

MapleHR — *HRMS(Human Resource Management System)*

- Engineered a comprehensive HRMS using Ruby on Rails, encompassing employee records, payroll, and performance management modules.

AGILE METHODOLOGIES

Scrum
Kanban

- Implemented RESTful APIs to facilitate seamless integration with other HR tools and third-party services.
- Employed background job processing with Sidekiq to handle asynchronous tasks, significantly improving system responsiveness.

Notcommon — *Social Links Portfolio*
- Developed a dynamic Social Links Portfolio platform to showcase personal and professional achievements.
- Utilized Rails views and partials to create a responsive user interface, enhancing user experience.
- Integrated OAuth for seamless authentication with social media platforms, enabling users to effortlessly import and display their online profiles.

Traded — *CRMS (Customer Relationship Management System)*
- Led the Ruby on Rails development for a cutting-edge CRM solution, significantly elevating client engagement and communication.
- Engineered a modular system for lead, contact, and customer interaction management, contributing to a notable 15% increase in client retention.
- Implemented secure user authentication and authorization using Devise and CanCanCan, ensuring robust access control.

Bullseye Hiring Solutions — *ATS(Applicant Tracking System)*
- Spearheaded the development of an innovative Applicant Tracking System using Ruby on Rails, revolutionizing the hiring process.
- Developed and implemented candidate management, interview scheduling, and automated communication features, resulting in a remarkable 20% reduction in hiring time.
